

## **Personal statement**

### **Introduce**

Project 3 is teamwork, we need to remix everyone's project 2 work together. There are four members in our group, each of whom has a different duty. I worked as a creative director in the team. There are several reasons why I choose this position. First of all, I served as the minister of the Student Union when I was an undergraduate, responsible for many activities, so I have rich experience in controlling the time and output of projects. Secondly, I am good at summarizing, I can coordinate the ideas of team members well. In addition, I have good communication skills. So I offered myself for the role.

### **My involvement**

On the one hand, I played a role in supervising and planning the whole project process. After determining the positions of the team members, I estimated the workload according to the skills mastered by the team members. The work was roughly divided up to make sure it was all done before the deadline. Then I immediately determined the meeting time and the future time plan, so that we could exchange ideas and follow up on the progress of team members. On the other hand, I am also involved in design and production. Our team did not work strictly according to duties, but helped each other during the project. I also made some visual outputs throughout the project. For example, visual integration of video materials, remix, selection of video background music,

production and printing of posters, etc.

### **My challenge**

I think the biggest challenge is when the team is exchanging ideas. Although our project 2 works on the same poem, everyone has different understanding and expression of the poem, and the style of the work will also be different. Remix needs to integrate the works of all team members, so it requires us to achieve unity of ideas. From the beginning, we all had our own ideas about what remix wanted to look like. Therefore, it is difficult for me to weigh the final plan after summary. Each idea has its own shining point. Besides, when communicating ideas, due to different starting points or cognition, it may be found that what is said is not the same thing at all. I think the precision of words in communication needs to be further strengthened.

Furthermore, some technical problems also trouble me. Although the positioning of the Creative director is the team's idea decision-making and control of the project process. However, I think the Creative director needs to master all skills, so that he can help any team members who need help and participate in any division of labor. In this project, after effects production is the field in which I cannot participate. I tried to teach myself how to make video effects. But I can't keep up with the due date. In the end, I only provided some video materials of my project 2. Unfortunately, I didn't make complete video

work in the end. I still need to keep learning.

### **Summary**

It is my honor to participate in the group work, which is my first group work.

While working with others, I can discover my own shortcomings. It's a good

chance to know and improve myself.
